Hydraulic Manipulator

Model: HYD-MAN

Hydraulic Boom Manipulator is a versatile tool designed to simplify the handling of glass in difficult-to-reach positions during glazing operations.

Design Features:

- Max design payload rating 1,000 lbs. (453 kg)
- Hydraulic actuated for precise and stable positioning.
- Fabricated from structural steel tubing with welded supports.
- 2.5 x 4" Dia steel swivel wheels.
- Manual winch includes 25-ft cable length
- Knock down in minutes for transport.
- Quick Assembly without tools for rapid deployment

Frame Options:

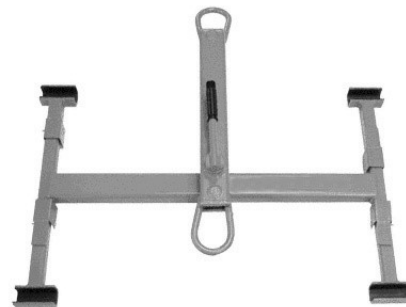

- Extension accessory for increased reach or height. Model MAN-EXT
- Outrigger attachments for enhanced stability Model MAN-OUT

Lifting Options:

- Vacuum Cup Frames (4 or 6 cup) ideal for lifting glass panels. Model VCF

Optional 4 or 6 Cup Frame
